

AN EQUITABLE WAY TO FUND SCHOOLS

IN CALIFORNIA

Before: Categorical System

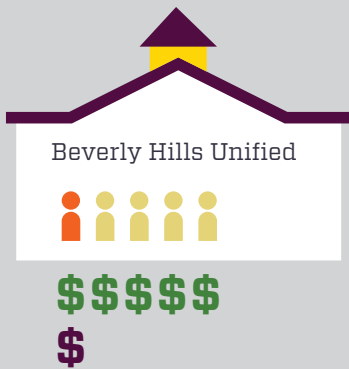

All schools were funded equally irrespective of need and funding was allocated to fixed budget categories.

 Students

 Students who need additional support

Low income students
Foster students
ELL students

After: Local Control Funding Formula (LCFF)

Funding goes where it is needed most. With LCFF, LAUSD and other districts receive a base grant, plus supplemental and concentration grants based on their student populations.

 Base Grant

 Supplemental Grant

 Concentration Grant*

*Districts receive a concentration grant if over 55% of total enrollment is comprised of high-needs students.

How the money can be spent

Schools have the power to spend money where it has the most impact, provided that it goes to supporting one of these LCFF priorities:

- Basic Services
- Course Access
- Parental Involvement
- School Climate
- Student Achievement
- Student Engagement
- Implementation of Common Core Standards
- Other Student Outcomes

THE PROMISE OF LCFF: LAUSD and its schools now have the power to spend money directly on the students of greatest need, provided that these dollars go toward supporting these core principles. But for this promise to become a reality, educators and our community need to be informed and engaged advocates for keeping this promise.
